

Reduce your energy costs with Swiss Solar Tech Ltd

Swiss Solar Tech specializes in efficient heating and cooling systems that combine energy efficient techniques and technologies.

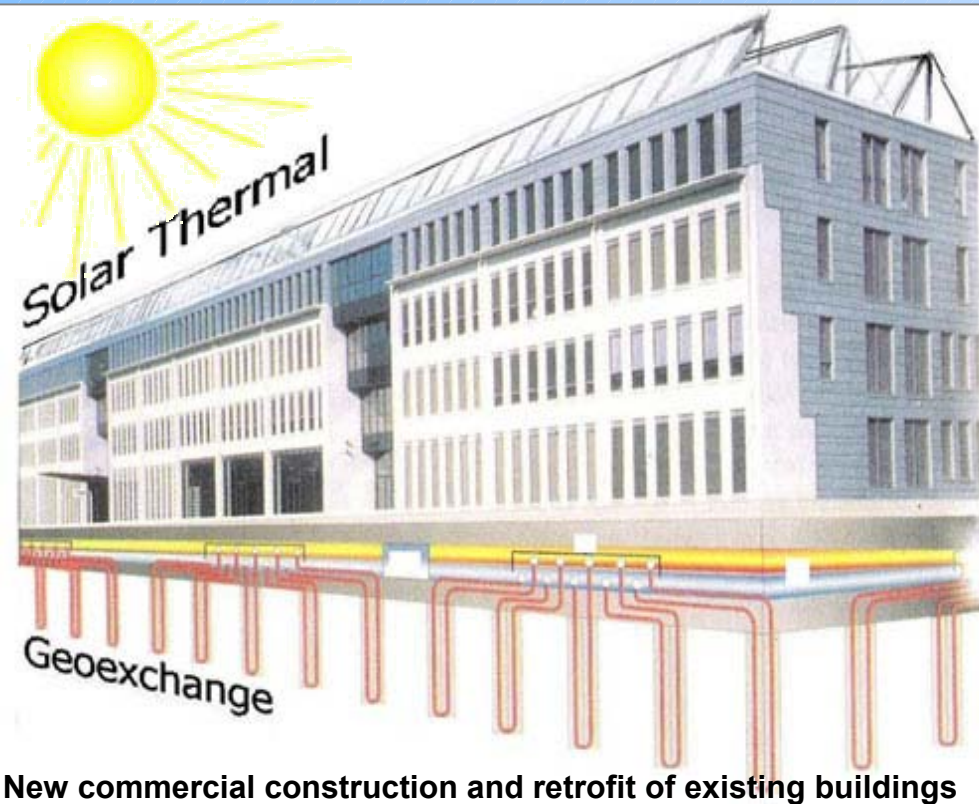

Thermal solar, heat pumps, geothermal, waste heat recovery, thermal water storage and other environmentally friendly techniques are combined.

Engineering design, equipment, installation, controls and system commissioning are all provided.

Operation cost savings of 50 – 70% over conventional HVAC systems.

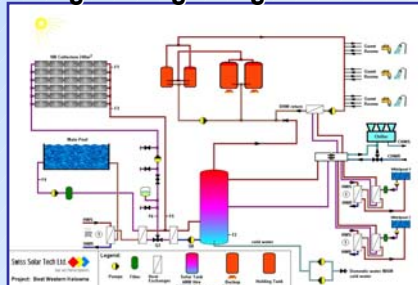

New commercial construction and retrofit of existing buildings

Swiss Solar Tech provides highly efficient heating and cooling systems for commercial and multi-residential buildings. Our services include personalized:

■ Consulting

■ Engineering Design

■ Installation

■ Recovering Government Incentives

■ System Financing
