Re: Solar Hot Water Heating installation.

We would like to let you know that we were very pleased with your presentation and for all the information that you were able to help us in understanding the system.

The install went very well and we were left with good information as to maintaining the system as well as the DVD and literature. Your crew left all the areas very clean and were a delight to have in our home.

We would certainly recommend your company and you can use our names as references.

Thanks again, keep the sun shining and we will all benefit from this new age system.

Lou, Marilyn and Betty Joan.
