Re: Letter of Satisfaction and Recommendation for –Swiss Solar Tech Ltd.

Dear Roger,

This letter is to express our sincere thank you to your company, your workers and yourself for the installation of our solar heating system for our motel, campground and swimming pool. Since the installation of our solar heating system our natural gas expenses have been considerably reduced and we are very impressed with the smooth trouble free operation.

We would like to thank you for the fine workmanship, knowledgeable skill that you and your workers showed throughout the entire installation process. We were very impressed by the service you gave us during and after the installation.

Please feel free to use this letter in your business and we would be very pleased to talk to any potential parties seeking information about your company and the benefits of solar heating. We give you our permission to use this letter and our business as an example of your work to promote your solar heating endeavors.

Sincerely yours,

**Mr. Rod Gustafson,
Owner / Operator.**
